

Flex-Atex™ FDA & ATEX polyurethane flexible connectors

We are currently offering a new flexible product to be used with Jacob™ quick connecting pipe systems.

The flexibles are manufactured from a clear FDA and ATEX approved abrasion resistant polyurethane and can be produced in any given lengths and diameters.

These can be easily fitted with a standard Jacob™ clamp or Jacob™ over centre toggle clip for a quick release, all of which are readily available.

Advantages:

- Quick fitting using Jacob™ over centre toggle clips, designed to mate up with Jacob™ clamping systems. No tools required.
- Clear FDA & ATEX rated polyurethane flexible membrane.
- Smooth internal surfaces for ease of product flow and cleaning.
- Alternative clamps available to prevent accidental access for health & safety.
- Can be incorporated into existing pipe work removing the need for on-site welding.
- Low cost mating fixings. Jacob™ pipe stubs are readily available off-the-shelf.
- Each flexible can be manufactured to incorporate convoluted gaiters and bellows for vibratory sieve equipment or load cell weighing applications.
- Flexibles can be manufactured for use on vacuum applications. Stainless steel external hoops are incorporated to maintain shape under vacuum conditions.
- Any bespoke shapes, sizes and lengths can be produced.
- Quick turn round on all designs when required.
- UK manufactured.
